With 20 branch offices we are your close and competent partner around the world. Due to our business structure – independent of multinational groups – we can certainly offer you the necessary services and flexibility.

+

Partner

The comprehensive knowledge of transport and logistics services provided by the specialized team at Schryver could be the key to your success. We offer a complete range of logistics services and overseas trade, and furthermore: we are independent! This means you get a company that allows for efficient decision-making, fast response time, and also more flexibility than usual!

Schryver Plus

You are entering into new markets? We are at your full disposal – personally in Germany and Latin America, and around the world with our long-term partners. Use our local experience! In cooperation with our suppliers and customers, we plan and design the flow of goods – and this all around the world.

PROJECTS

Since 1929

Traditionally innovative – for you we keep on moving

We are in the business of moving your cargo, and therefore, must remain in motion, too. This is the only way, with more than 80 years of experience in the market, to meet your demands successfully. We are as fast and reliable, while remaining as affordable as possible. We can be on every continent, in every possible way.

Seafreight

Count on our experience, reliability and the personal service of a medium-sized forwarder. We offer regular LCL and FCL shipments, worldwide in cooperation with our branch offices and experienced agency network.

Airfreight

With regular departures and consolidated shipments, we serve the important centres of the world. We have an adequate Know-How and can therefore ensure not only on time and on budget handling but also reach our customers in remote areas.

Logistics

As a modern logistics service provider, we can take care of the entire organization, control and handling of your flow of goods and information. Logistics is more than just moving goods. We plan and design your processes in terms of logistics value.

Projects

Project cargoes are always a special case – every job is different and presents us with new tasks which must be handled both quickly and affordably. We have decades of experience as a logistics service provider, be it for machines, vehicles or industrial facilities.
